SUMMARY

Final-year B.Tech student at VIT Bhopal with a strong focus on Agentic AI, Generative AI, and intelligent automation. Proven ability to design and ship production-ready AI systems — including a deployed multi-agent data analysis platform built on LangGraph, Groq, and FastAPI. Deeply interested in LLM-based systems, RAG pipelines, and autonomous workflow design. Seeking AI engineering or intelligent automation roles where I can build systems that solve real problems at scale.

PROJECTS

NEXUS - Multi-Agent Data Analysis Platform

 [GitHub](#) | [Live Demo](#)

- Designed and deployed a full-stack multi-agent AI platform that orchestrates 3 specialized LLM agents (EDA, Statistical, Insight) via LangGraph on Groq's LLaMA 3.3 — automating the entire data analysis workflow from raw CSV upload to PDF report generation.
- Engineered a production-grade backend using FastAPI, PostgreSQL, Redis caching, and Celery for async task processing — enabling concurrent dataset cleaning, ML model training, and report generation without blocking the main thread.

Personal RAG Chatbot - Document Q&A with Local LLM

 [GitHub](#)

- Built a fully offline, end-to-end RAG pipeline that ingests personal documents, generates semantic embeddings via HuggingFace sentence-transformers, and stores them in ChromaDB — enabling accurate, context-aware document retrieval without any cloud dependency.
- Delivered an interactive Streamlit interface with PDF upload, persistent conversation memory, and source chunk visibility — powered entirely by Llama 3.2 via Ollama for on-device inference.

Nova - Local-First Personal Assistant OS *(In Progress)*

 [GitHub](#)

- Architecting a modular, fully on-device personal assistant powered by Ollama (Llama 3) — integrating a GitHub-connected project dashboard, Gmail agent, Pomodoro focus mode, file tracker, and task manager into a unified FastAPI + React interface.
- Implementing a hybrid memory layer using ChromaDB for semantic search and SQLite for structured persistence — enabling context-aware responses across sessions without any cloud dependency.

EDUCATION

2023 – 2027	B.Tech in Computer Science at VIT Bhopal University	GPA: 8.90 / 10
2023	Class 12th — CBSE Board	88.4%
2021	Class 10th — CBSE Board	91.2%

CERTIFICATIONS

- Oracle Cloud Infrastructure - Generative AI Professional [View](#)
- NPTEL - Cloud Computing [View](#)
- Applied Machine Learning in Python - Coursera (University of Michigan) [View](#)
- Japanese Language Proficiency - N5 Certified, currently pursuing N4 [View](#)

SKILLS

Languages & Libraries:	Python, NumPy, Pandas, Matplotlib, Streamlit, NLTK
AI/ML & Agents:	LangChain, LangGraph, HuggingFace, Ollama, Groq, RAG Pipelines, Prompt Engineering
Backend & Infra:	FastAPI, Redis, Celery, PostgreSQL, SQLite, ChromaDB
Automation & Tools:	n8n, Workflow Automation, Git/GitHub, Jupyter Notebook
Deployment:	Vercel, Render, Docker (basic)
